

EXCELLENCE IN BULK PACKAGING

High-Strength FIBC Solutions for Global Industries

OUR FOUNDATION & VISION

Our Foundation

Aries Packtech Pvt. Ltd. is a vertically integrated manufacturer of high-strength Flexible Intermediate Bulk Containers (FIBC). From raw polymer to final bag conversion, we ensure consistent quality, flexible production, and cost-efficient solutions designed for the world's most demanding industrial environments.

Our Core Principles

01

Integrated Manufacturing:

Complete vertical control ensuring zero compromises on quality.

02

Technological Precision:

Data-driven, digitally monitored production lines.

03

Responsible Production:

Focused efforts on sustainability and resource management.

ENGINEERED FOR SCALE AND PRECISION

Our state-of-the-art facility in Ayodhya, Uttar Pradesh, is built to handle high-volume global demands while maintaining microscopic attention to detail.

The Aries Ecosystem:

**01**

Advanced Extrusion:

High-capacity PP tape ensuring optimal tensile strength.

**02**

Precision Weaving:

Modern circular looms for defect-free, flat, and tubular fabrics.

**03**

Skilled Conversion:

Automated cutting and dedicated stitching lines for flawless bag construction.

**04**

Clean Room Facility:

Ensuring contamination-free packaging for food and sensitive materials.

OUR PRODUCTS

We engineer a versatile range of bulk bags, tailored to specific handling, storage, and transport requirements.

1. Baffle Bags

Baffle Bags: Engineered with internal baffles to maintain a square shape, optimizing pallet space and container loading.

2. Builder Bags

Builder Bags: Heavy-duty construction designed for rugged materials like sand, gravel, and aggregate.

3. Conical Bags

Conical Bags: Specifically designed with a tapered bottom to ensure the complete and swift discharge of sticky or bridging materials.

4. Two-Loop Bags

Two-Loop Bags: Cost-effective solutions for easy lifting and handling of agricultural and mineral bulk.

5. WPP Bags

WPP Bags: Flexible, strong, and reusable packaging containers made from woven strips of polypropylene.

TAILORED TO YOUR OPERATIONS

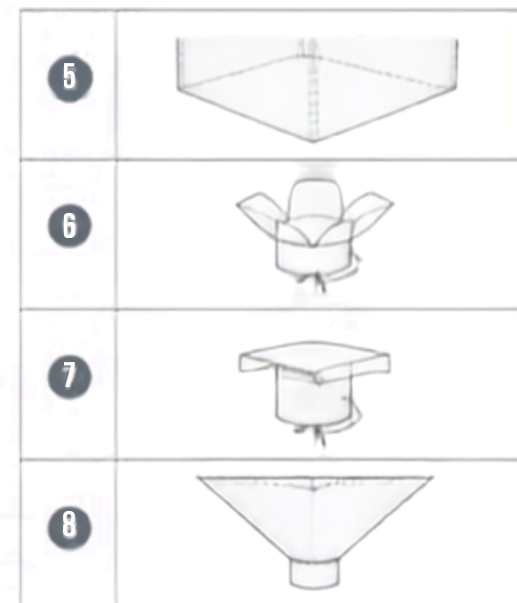

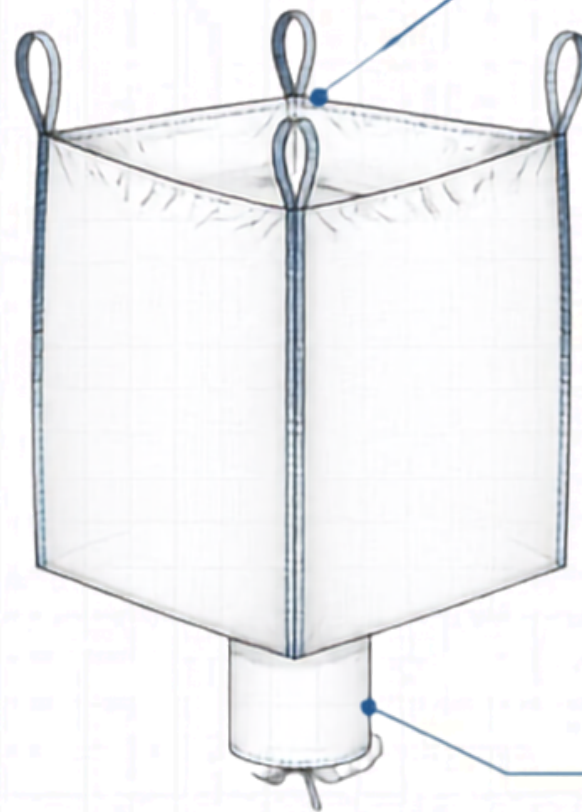

Every industry handles materials differently. We offer comprehensive customization to integrate seamlessly with your filling and discharging equipment.

Top Attachments:

- 1 Open Top with Hem
- 2 Duffel / Skirt Top
- 3 Filling Spout
- 4 Conical Top

Bottom Attachments:

- 5 Flat / Plain Bottom
- 6 Discharge Spout with Petal Closure
- 7 Discharge Spout with Protection Flap
- 8 Conical Bottom

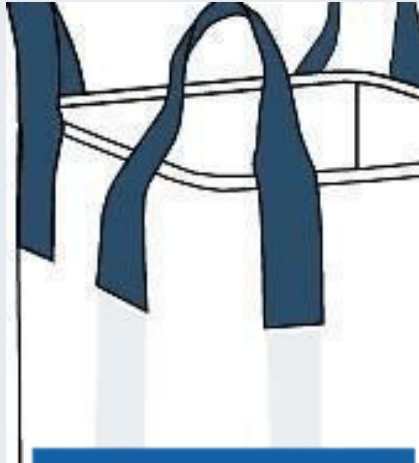

LIFTING & FABRIC OPTIONS

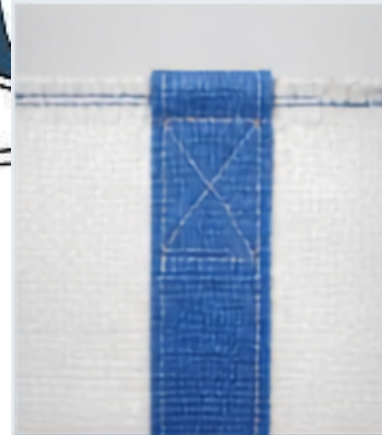

01

Lifting Configurations

- Four Corner Loops
- Cross Corner Loops
- Stevedore Straps
- Single & Two Loop Systems

CROSS-CORNER LOOP

STEVEDORE STRAP

02

Fabric & Material Specs

- **Fabric:** Woven without coating, One-side coated, Both-side coated.
- **Safe Working Load (SWL):** Configurable from 500 kg to 2000+ kg.
- **Safety Factor (SF):** 5:1 (Single trip) and 6:1 (Multi-trip).
- **Printing:** Up to 4 colors for brand visibility.

UNCOATED FABRIC

VS

COATED FABRIC

CONSISTENCY WITHOUT COMPROMISE

Quality is not just a department at Aries; it is integrated into every stage of our manufacturing process. We implement strict checkpoints to guarantee safety and durability.

Our Testing Protocols:

Tape & Fabric Testing: Tensile strength, elongation, and GSM verification.

UV Resistance: Ensuring longevity under prolonged sun exposure.

Rig Testing: Drop tests, load tests, and SWL compliance checks on finished bags.

Traceability: Complete backward traceability from finished product to raw material batches.

TRUSTED ACROSS SECTORS

Our packaging solutions are relied upon by industries where safety, hygiene, and durability are non-negotiable.

Agriculture:

Seeds, grains, fertilizers, and produce.

Food Industry:

Sugar, flour, spices, and starches.

Chemicals:

Resins, powders, and industrial chemicals.

Mining:

Minerals, ores, and carbon black.

Construction:

Cement, sand, gravel, and debris.

Petrochemicals:

Polymer granules and pellets.

COMMITTED TO THE FUTURE

At Aries Packtech Pvt. Ltd., sustainability drives our operational efficiency. We believe in manufacturing that respects the planet.

Energy Efficiency:

Adopting renewable energy and optimizing power consumption across our plants.

Recycling Initiatives:

Minimizing industrial waste through in-house recycling of PP waste.

Resource Management:

Focused efforts on water conservation and zero-pollution operational protocols.

100% Recyclable:

All our standard FIBC products are fully recyclable at the end of their lifecycle.

PARTNER WITH US

Looking for a reliable packaging partner? Our team is ready to engineer the perfect FIBC solution for your supply chain.
